

**Amendments to the Claims:**

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently amended) A method of controlling application devices ~~(103—106, 203, 204, 305, 405, 408—412)~~ said method comprising the steps of comprising:
  - retrieving first documents ~~(501)~~ from a first set of application devices by a server ~~(107, 205, 304, 404)~~;
  - retrieving identification ~~(115, 502)~~ of a user by the server;
  - ~~characterized in that the method further comprises the steps of:~~
    - autonomously generating ~~(505)~~ second documents by the server, each comprising ~~an~~ at least one instruction, on the basis of at least a part of the retrieved identification of the user and at least a part of the first documents;
  - sending ~~(506)~~ at least one of the second documents to each device of a second set of the application devices by the server; and
  - performing ~~(507)~~, for a given device of the second set, one instruction from at least one of the second documents received in the given device.
2. (Currently amended) A method according to claim 1, characterized in that the step of retrieving identification of the user further comprises the steps of
  - retrieving user profile ~~(503)~~ information based on the user identification by the server; and
  - retrieving context profile information ~~(504)~~ relating to surroundings of the user by the server.
3. (Currently amended) A method according to claim 1, characterized in that the documents comprise at least one of Hyper Text Markup Language, Scalable Vector Graphics, Resource Description Framework and Extensible Markup Language ~~(XML)~~.

4. (Previously presented) A method according to claim 1, characterized in that the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

5. (Currently amended) A system for controlling application devices ~~(103—106, 203, 204, 305, 405, 408—412)~~ comprising:

means for ~~(107, 205, 304, 404)~~ retrieving first documents from a first set of application devices;

means for ~~(107, 205, 304, 404)~~ retrieving identification ~~(115)~~ of a user;

~~characterized in that the system further comprises:~~

means for ~~(107, 205, 304, 404)~~ generating second documents, each comprising ~~an~~ at least one instruction, on the basis of at least a part of the retrieved identification of the user and at least a part of the first documents;

means for ~~(107, 205, 304, 404)~~ sending at least one of the second documents to each device of a second set of the application devices; and

means for performing, for a given device of the second set, one instruction from at least one of the second documents received in the given device.

6. (Currently amended) A system, according to claim 5, characterized in that the means for retrieving identification of the user further comprises:

means for ~~(107, 205, 304, 404)~~ retrieving user profile information based on the user identification; and

means for ~~(107, 205, 304, 404)~~ retrieving context profile information relating to surroundings of the user.

7. (Previously presented) A computer system for performing the method according to claim 1.

8. (Previously presented) A computer program product comprising program code means stored on a computer readable medium for performing the method of claim 1 when the computer program is run on a computer.

9. (New) A method according to claim 2, characterized in that the documents comprise at least one of Hyper Text Markup Language, Scalable Vector Graphics, Resource Description Framework and Extensible Markup Language.

10. (New) A method according to claim 9, characterized in that the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

11. (New) A method according to claim 2, characterized in that the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

12. (New) A system for controlling an application device comprising  
a server that is configured to:

retrieve first documents from a first set of application devices;

retrieve identification of a user;

autonomously generate second documents, each comprising at least one instruction on the basis of at least a part of the retrieved identification of the user and at least a part of the first documents; and

send at least one of the second documents to each device of a second set of the application devices for performing, at a given device of the second set, at least one instruction from at least one of the second documents received in the given device.

13. (New) The system of claim 12, wherein the server is configured to retrieve the identification of the user by:

retrieving user profile information based on the user identification; and  
retrieving context profile information relating to surroundings of the user.

14. (New) The system of claim 13, wherein the documents comprise at least one of Hyper Text Markup Language, Scalable Vector Graphics, Resource Description Framework and Extensible Markup Language.

15. (New) The system of claim 14, wherein the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

16. (New) The system of claim 13, wherein the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

17. (New) The system of claim 12, wherein the documents comprise at least one of Hyper Text Markup Language, Scalable Vector Graphics, Resource Description Framework and Extensible Markup Language.

18. (New) The system of claim 17, characterized in that the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.

19. (New) The system of claim 12, characterized in that the application devices comprise at least one of Web tablet, set-top box, VCR, TV, PDA, lamp, coffee machine, radio, telephone, background wall, DVD player and electronic information panel.
